

Task 27 - Executing regression test

Report creation date: 07.02.2023

Name of the tested application: <https://warsawsneakerstore.com/>

Author: Paweł Kurzydło

The application I tested is not being actively supported, which means that no significant modifications are being made to it and existing defects in the application are not being fixed, as I observed during the retests I performed for the previous task.

TEST	EXPECTED RESULT
Account registration	Account has been created
Login	The user has logged in
Editing data in the user's profile and checking the preview of orders / complaints	All forms and sections work fine
Product browser	The application searches for products / brands correctly
Store cart and favourites	Correctly adding products to favourites and the basket, and increasing or decreasing their quantity
Computing free shipping	Free shipping is calculated correctly when the appropriate values in the basket are exceeded
Product categories	Categories and assigning products to them work correctly
Filtering and sorting prices	The price sorting methods work flawlessly and the filtering defines the values of the selected range correctly
Newsletter	The user is registered correctly and a return e-mail arrives
The ordering process and checking the integration with payment providers	The order is registered in the system and the user is redirected to the supplier's website for payment
