

Task 16 - Test design

Report creation date: 06.01.2023

Name of the tested application: Warsaw Sneaker store

Author: Paweł Kurzydło

For this task, I have chosen the registration function and will list 10 ways to test all the forms.

1. In the email form, check if it is possible to enter an email without the '@' symbol
2. In the email field, also check if it is possible to enter an email without the domain name
3. Check if it is possible to enter spaces in each of the forms.
4. Check if any of the forms have no limit on the number of characters that can be entered
5. Check if it is possible to enter numbers and special characters in the first name field
6. Check if there is a requirement for a minimum number of characters in the first name field
7. In the password form, check if it is possible to create a password without entering the required security characters (uppercase letter, lowercase letter, special character, digit)
8. In the password form, check if it is possible to enter fewer characters than the required number
9. Check the possibility of registering without filling in the required forms
10. In the phone form with the prefix +48, check if it is possible to enter less or more than 9 digits
