

Task 1 - Application Selection

Report creation date: November 22, 2022

Author: Paweł Kurzydło

Regarding the selection of an application for testing, I have chosen <https://warsawsneakerstore.com>. I sometimes browse the website when I receive notifications via email. I have analyzed it based on the requirements and I think it will be suitable because it has all the functions that an online store should have. As for sensitive data, it only occurs during the finalization of transactions, but this is a requirement for every online store and I hope it will not be an obstacle. The website is not simplistic, it has many brands, categories, sorting and filtering options, and a bottom navigation bar for mobile browsing. Using the tools recommended by you, I have included some information about the website in the report below.

Website Information Overview for <https://warsawsneakerstore.com/>

Registrar: Key-Systems GmbH

Domain Status: clientTransferProhibited

Created on: February 24, 2016

Last updated on: January 27, 2022

Expires on: February 24, 2023

Server IP: 104.26.10.177

Server Location: United States, California, Cloudflare Inc.

Using the tool <https://check-host.net>, in the HTTP protocol tab, the status code 403 error was detected in several countries listed in the section, indicating forbidden access.
