Task 9 - Compatibility testing
Name of tested application: https://warsawsneakerstore.com/
Report creation date: 19.12.2022
Author: Kurzydło Paweł

Devices used in testing:
MacBook Pro (13-inch, M1, 2020) (macOS Monterey 12.6) and
iPhone X (iOS 16.1.1)

Browsers used in testing:
Google Chrome (Version 108.0.5359) - Desktop
Safari (Version 15.6.1 (17613.3.9.1.16)) - Desktop
Opera (Version 56.0.3051.104) (Release Nov 16th, 2018) - Desktop
Safari (Version 16.1.1) - Mobile
Chrome (Version 108.0.5359.112) - Mobile

I started testing on two devices at the same time, using each of the
above browsers simultaneously. I tested the following modules of
the application:

- Registration
- Login
- Cart
- Favorites

I also conducted short exploratory tests of the entire application,
including the product search. The application also works flawlessly
on Opera from 2018. I did not encounter any complications in
operation on any of the browsers except for one defect, which
occurred on the mobile side in Safari and Chrome browsers. The
defect on the Google browser side was resolved after clearing the
site data.

Name: Missing social media icons
Description: Social media icons at the bottom of the app are not displayed.

Category: Usability
Priority: Low
Current result: Social icons not showing even after clearing site data
Expected result: App should display social media icons after clearing cookies and browser data

Environment: https://warsawsneakerstore.com, Iphone X (IOS 16.1.1, Safari 16.1.1
